## VIRTUE ALONE ENNOBLES

---

St. Joseph's convent founded in 1875, is one of the pioneer institutions of Nagpur in the field of education managed by 'The Sisters of St. Joseph's of Chambery'. The great traditions of the past are maintained and improved upon as the years go by. To answer the needs of the time, which is the Charism of our congregation, we have opened a co-education school at Fetri, Nagpur.

The top priority of our school is the overall development of the pupils, through various activities with special emphasis on moral values and academic excellence.

Education must be a partnership between the school and parents if we are to prepare our children well to meet the challenges and needs of the future. Hence we need your cooperation, dear parents, in this connection.

May our Divine Guru fulfill our vision and aspirations for all the students who pass through the portals of S.J.C.

# INNOCENCE

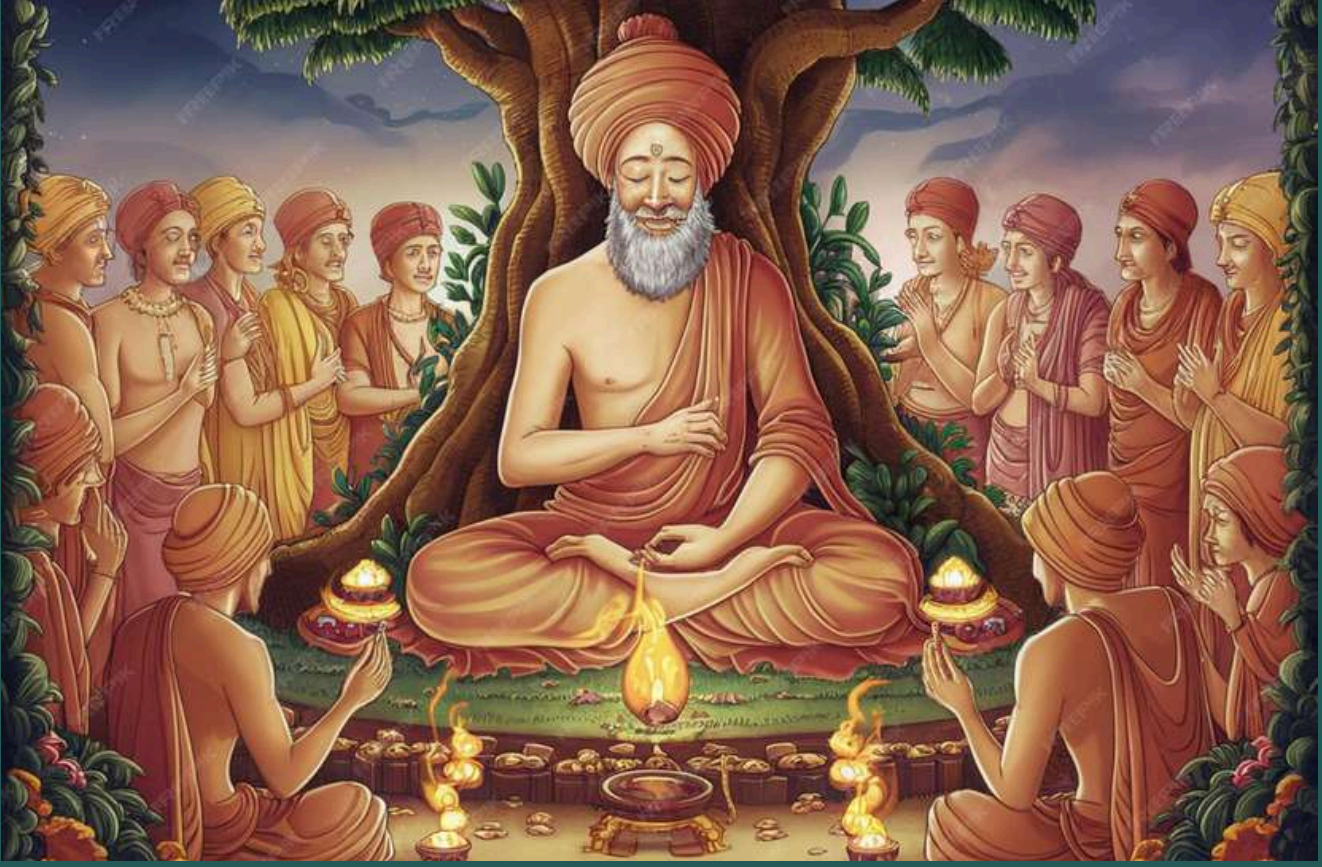

RASIKA SHENDE

***“The innocence of children is a precious gift that should be cherished.”***

---

*The innocence they hold is no  
where to be found.  
A possession of pure heart with  
a playful soul.  
No voice gets to their ears  
unless it is their mother's call.  
Life for them is a game  
filled with toys and friends.  
No hatred, No anger,  
No resentment they possess.  
It just them with themselves.*

# ARTIFICIAL INTELLIGENCE

Artificial Intelligence, or AI, is a type of technology that allows computers to think and learn like humans. It involves programming machines to perform tasks that usually require human intelligence, such as understanding language, recognizing images, and making decisions. AI systems learn from data, finding patterns and using them to make predictions or solve problems.

AI is important because it helps us do things faster, more accurately, and more efficiently. It can handle repetitive tasks, freeing up humans for more creative work. AI also helps solve complex problems, such as diagnosing diseases or predicting natural disasters, that are too big for humans to tackle alone. By improving productivity and offering new solutions, AI plays a crucial role in advancing technology and improving our daily lives.

**"I VISUALISE A TIME WHEN WE WILL BE TO ROBOTS WHAT DOGS ARE TO HUMANS, AND I'M ROOTING FOR THE MACHINES."  
—CLAUDE SHANNON**

AI is used in many areas of our lives. In smartphones, AI powers voice assistants like Siri and Google Assistant, helping us with tasks and answering questions. In healthcare, AI helps doctors diagnose diseases by analyzing medical images. Online shopping platforms use AI to recommend products based on our past purchases. Additionally, AI is used in transportation for self-driving cars and in video games to create challenging opponents. AI's wide range of applications shows how it can enhance various aspects of society.
